MICROBIAL INOCULANT

NONPLANT FOOD INGREDIENT

Composition

Bacillus subtilis.....	80 million CFU/g	B. licheniformis.....	80 million CFU/g
B. megaterium.....	80 million CFU/g	B. amyloliquefaciens.....	80 million CFU/g
B. pumilus.....	80 million CFU/g	B. coagulans.....	80 million CFU/g
B. azotoformans.....	80 million CFU/g	B. firmus.....	80 million CFU/g
Paenibacillus polymyxa.....	80 million CFU/g	P. durum.....	80 million CFU/g
Pseudomonas fluorescens....	16 million CFU/g	P. aureofaciens.....	16 million CFU/g
P. putida.....	16 million CFU/g	Streptomyces lydicus.....	16 million CFU/g
S. coelicolor.....	16 million CFU/g	S. griseus.....	16 million CFU/g
Trichoderma harzianum.....	16 million CFU/g	T. reesei.....	16 million CFU/g
T. hamatum.....	16 million CFU/g		

How to use

- Growing media: 2 to 4 oz per cubic yard.
- Nursery: 2 to 4 oz per cubic yard every 2 weeks.
- Ornamental & raw crops: 5 to 12 oz per acre per month, or at planting or at 3 leaves stage, pre-flowering and at fruit formation.
- Grains: 7 oz per acre at emergence & florescence.
- Trees: 4 to 6 oz per acre per month.

Storage

Avoid moisture and direct sun exposure.

Available packages

8 oz, 1 lb, 2 lbs, 25 lbs, 200 lbs.
